

Water and Wastewater Operator Certification Program Affidavit

INFORMATION RELATIVE TO SHARING OPERATOR SERVICES

Per 567 IAC 81 and Chapter 455B, Code of Iowa an owner of a plant or distribution system is required by law to operate under the supervision of a certified operator-in-charge of the same grade or higher. The facility owner may satisfy that requirement for grade A, I, IL, II, or IIL by securing the services of a properly certified operator of the same grade as the plant or distribution system and jointly executing this affidavit with that certified operator.

Completion of this affidavit makes the undersigned certified operator the operator-in-charge of the undersigned owner's facilities and directly responsible for the daily operation of the facilities. Therefore, the certified operator must have authority to direct local staff conducting the day-to-day operation of the facilities, including direction of the work efforts of other employees. This includes ensuring the completion of all required operation reports, ensuring all sampling takes place as required, maintaining the plant or distribution system in good condition, and operating the plant or distribution system in accordance with requirements of Iowa Code Chapter 455B and the Iowa Administrative Code (IAC). Failure of the local staff to provide responsible maintenance or operation of a facility could result in disciplinary action against the operator-in-charge, in accordance with 567 IAC 81.

By completing and signing this agreement, the undersigned facility owner and undersigned certified operator-in-charge agree to the following:

- The facility owner delegates to the operator-in-charge the authority necessary to operate and maintain the facility owner's plant or distribution system in accordance with all applicable laws and rules;
- The operator by affidavit assumes direct responsible charge of the systems operation and maintenance;
- The facility owner and operator-in-charge understand the municipality, public water supply, or semi-public sewage disposal system does not have first rights to the services of the operator-in-charge;
- The Iowa DNR may assign additional requirements to the facility owner and operator-in-charge;
- The Iowa DNR must approve the agreement between the facility owner and operator-in-charge. If the Iowa DNR disapproves of the agreement, the facility owner and the certified operator must terminate their agreement;
- Operator by Affidavit is allowed only for facilities classified as Grade A, I, IL, II, or IIL.

Four (4) original notarized affidavit forms must be completed and submitted for review to the Iowa DNR Field Office in the region in which the facility resides.
