### Electronic Copy of LUST Site Reports

Effective July 1, 2024, the Department of Natural Resources (DNR) is requesting an electronic copy of Leaking Underground Storage Tank (LUST) site reports be submitted in addition to the required hard copy for DNR review. Electronic copies of reports should be submitted to [ust.rbcasoftwaremtbe@dnr.iowa.gov](mailto:ust.rbcasoftwaremtbe@dnr.iowa.gov).

Be aware reports for LUST sites may not be considered as “received” by the DNR until both an electronic AND a hard copy of the report is received. The Tier 2 Site Cleanup Report and Site Monitoring Report online application or bedrock software file must also still be submitted.

The additional request for an electronic copy of LUST site reports is being made as the DNR is in the process of converting all LUST site records to online availability. Moving forward this should increase transparency and accessibility to the LUST site records.

If you have questions or concerns regarding the request for an electronic copy of LUST site report submittals in addition to a hard copy, please contact the DNR LUST Site Project Manager.
