

UNIVERSAL WASTE

Metro Waste Authority

Types of Universal Waste

- Batteries
- Pesticides
- Mercury-containing equipment
- Lamps
- Aerosols (May 2020)

Universal Waste

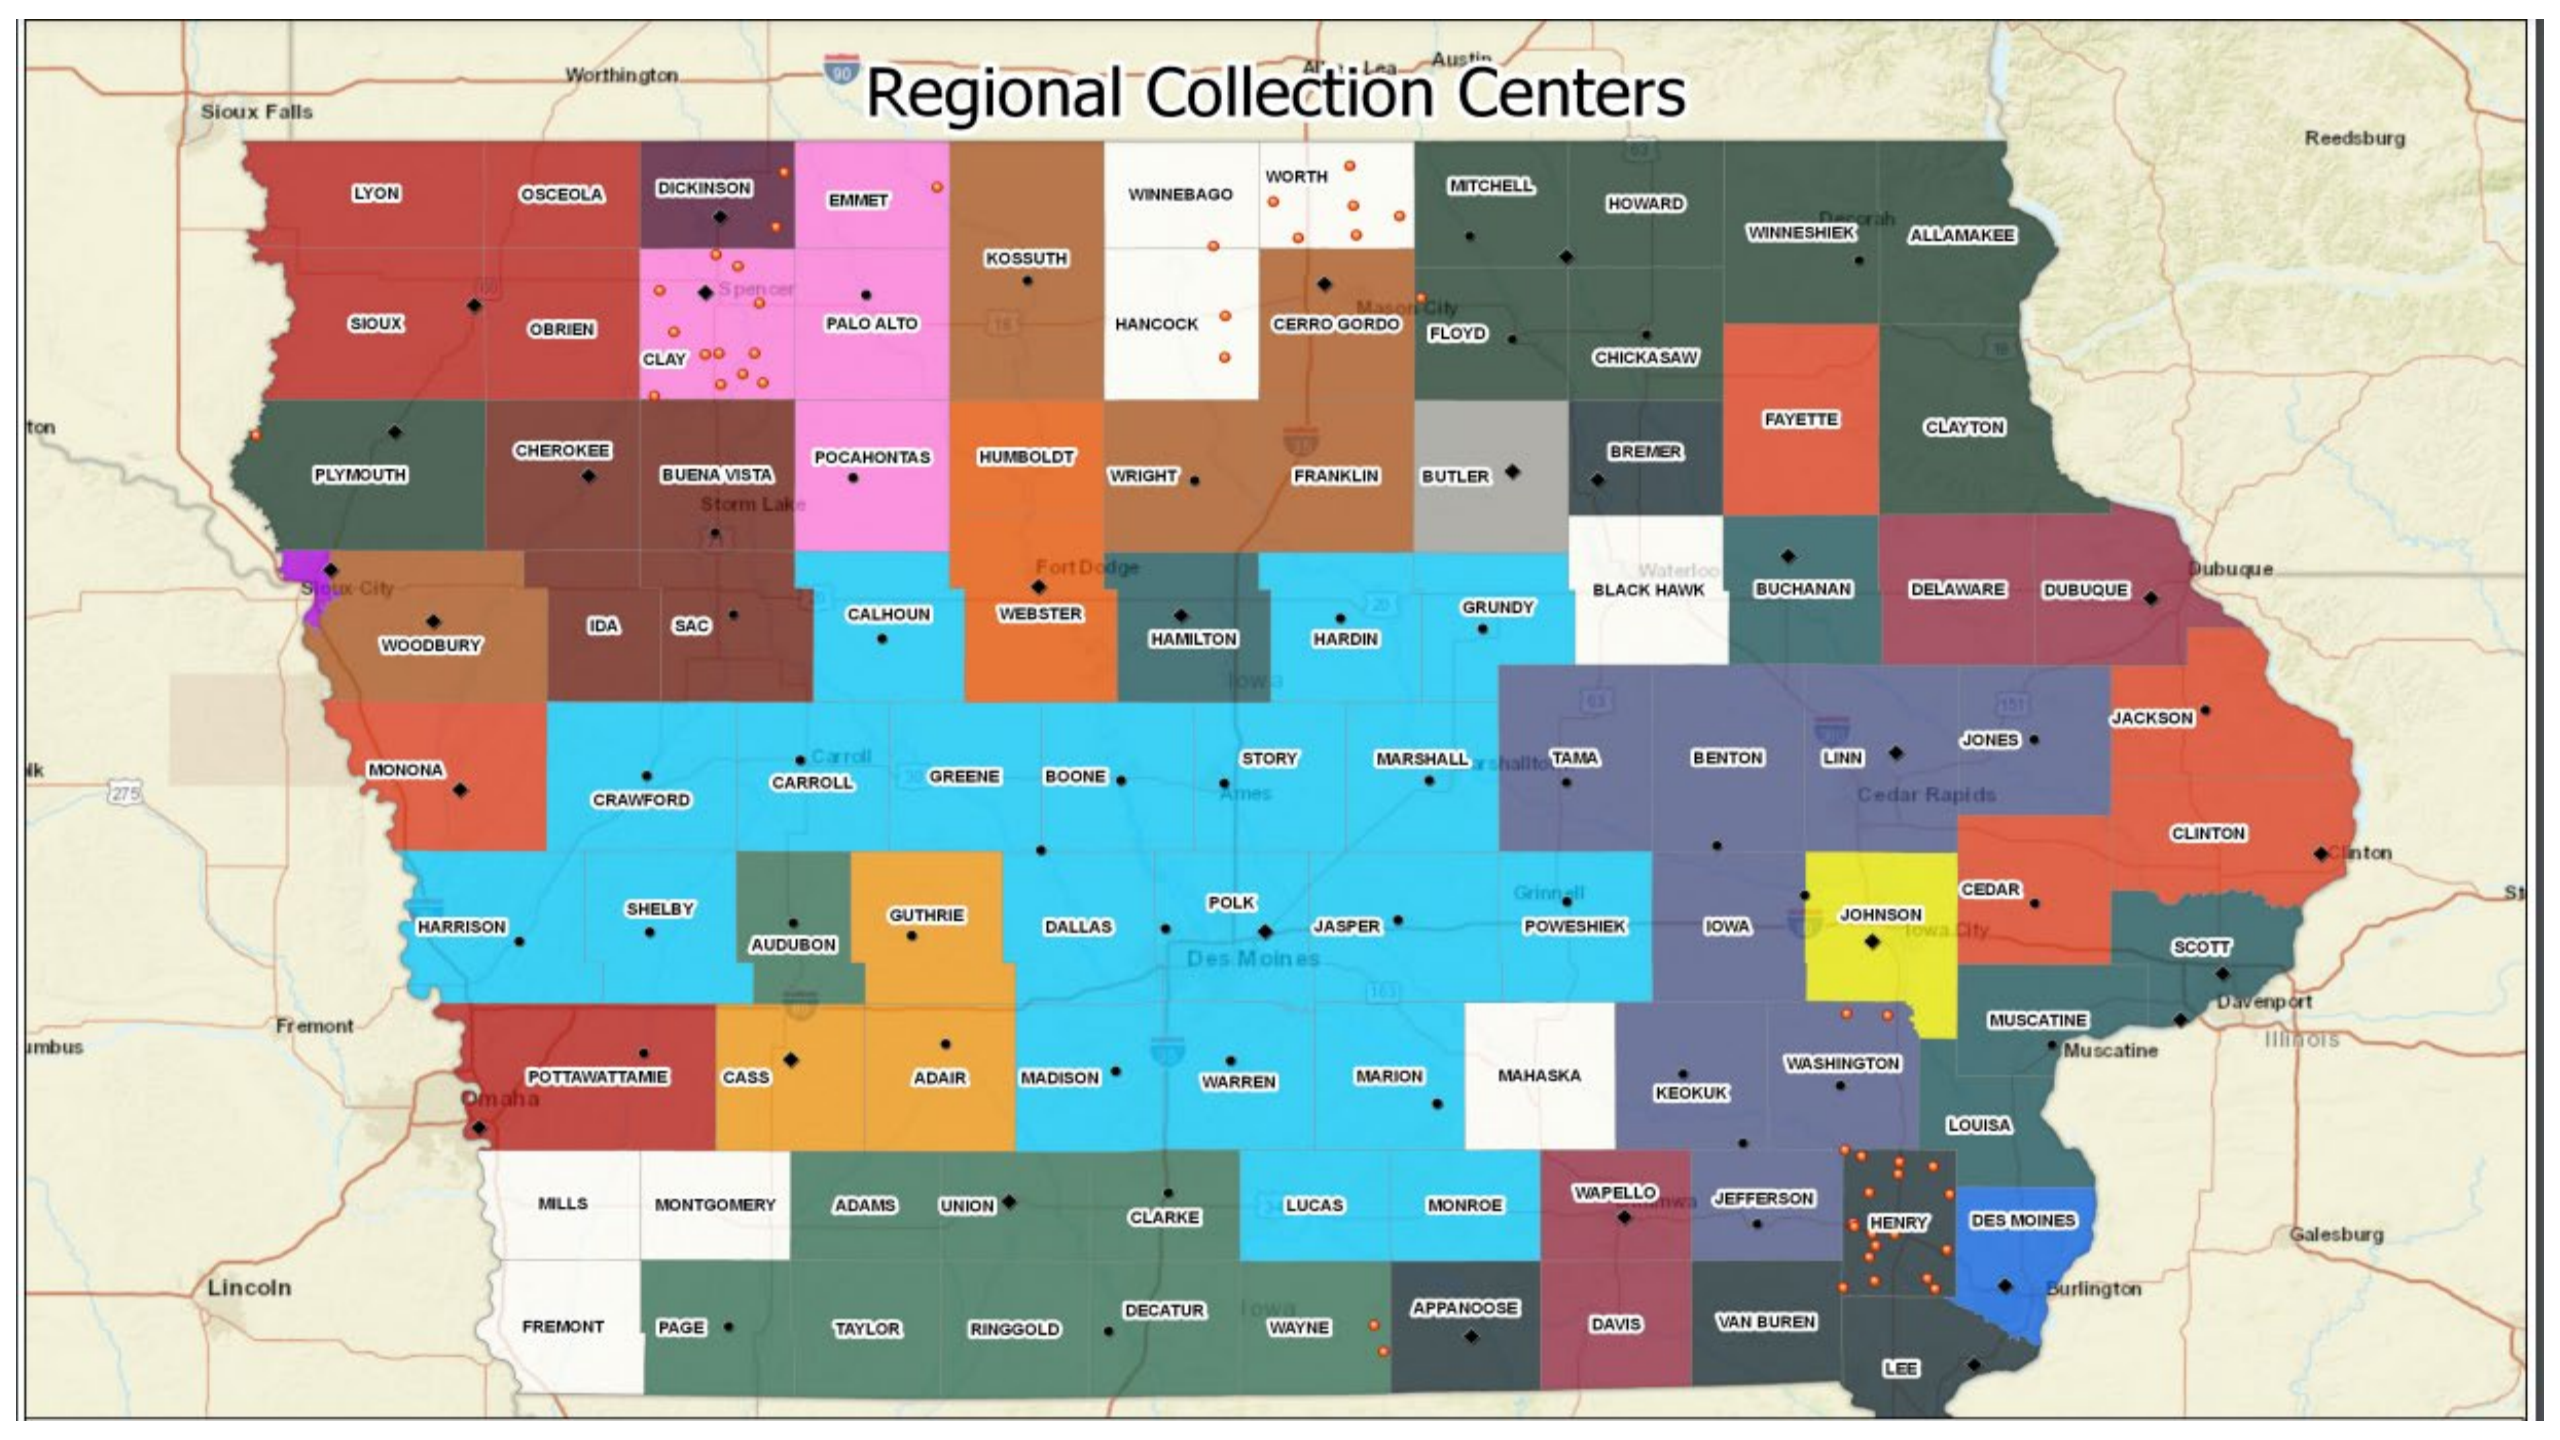

"Universal waste" means a hazardous waste identified as a widely-generated waste and has relaxed management requirements.

Used to promote greater proper handling

- Easier to accumulate them on-site
- Easier to ship through common carrier
- Simplified associated paperwork

Regional Collection Centers

HAZARDOUS WASTE | *Business Collection & Drop-Off Services*

Certification Form (By law, this form must be kept on file)

I certify that I am a generator of hazardous waste within the State of Iowa and that because of the small volume of hazardous waste generated and/or stored, I qualify for conditionally exempt small quantity generator status.

I understand that to qualify for conditionally exempt small quantity generator status, I must meet both of the following conditions (as defined by 40 CFR Section 261.5):

- » Generate less than 1kg/month (2.2 pounds) of acute hazardous waste, and never store more than this amount on site at any time; and

- » Generate less than 100 kg/month (220 pounds) of all other hazardous waste, and never store more than 1,000 (2,200 pounds) on the site at any time.

I further understand that if, in the future, I exceed the quantity limitations described above, I will become subject to additional regulation as a hazardous waste generator and will no longer be eligible to participate in this type of collection program.

I certify that I have the right to make these statements on behalf of my farm or business.
