

ISO EMS and Iowa Manufacturers: Company Perspectives

***Wednesday, March 29th, 2023
1:00pm – 2:15pm***

*Does your facility have an ISO:14001 (or ISO-based) Environmental Management System (EMS)?
Are you always on the lookout for new ideas, resources or strategies to develop or improve your EMS?
Do you enjoy learning from and exchanging ideas with other environmental professionals?*

Join us for the latest in our *EMS In Depth* webinar series, *ISO EMS and Iowa Manufacturers: Company Perspectives*, where we welcome representatives from two large Iowa manufacturing facilities to share their company's experiences and successes with an active ISO: 14001 certified Environmental Management System (EMS). Attendees will hear from Eaton Davenport, which manufactures aircraft components and systems for commercial and military aircraft, and Barilla America, Inc., a world leader in the markets of pasta and ready-to-use sauces. Both companies have successfully used their EMS as a powerful tool to aid in reducing their environmental impacts and increasing their operational efficiency.

Presenters will share:

- A brief history of their company's EMS
- An overview of their EMS structure and format
- Challenges they've faced and strategies they've employed to overcome them
- Success stories on how EMS has benefitted their company's environmental and operational processes.

There will be plenty of time for Q&A throughout each presentation, as well as open discussion time at the end, so come prepared to be a part of the conversation! Attendees will leave armed with new perspectives, ideas and resources they can utilize in development or continuous improvement of an EMS at their own facilities.

Attendance at the webinar is free, but pre-registration is required. To register, click on the link within the event agenda that follows. Feel free to contact P2 Services (p2services@dnr.iowa.gov or 515.205.8251) with any questions regarding the webinar or how to register.

We look forward to seeing you on March 29th!
