

Iowa DNR/Household Hazardous Materials

Material: Biodiesel and home-made biodiesel manufacturing by-products.

Potential Hazards: Biodiesel production by-products can include: glycerin, methanol, sodium hydroxide or potassium hydroxide, and sodium methoxide.

Recycle/Reuse: N/A

Proper Disposal: Take this product to your local Regional Collection Center. Very Small Quantity Generators (VSQG) may dispose of biodiesel and biodiesel by-products at their local Regional Collection Centers for a fee, find yours at iowadnr.gov/hhm under the RCC tab.

Green Alternatives: Although Biodiesel is a green product and may save you more money than petroleum-based fuel products, it may be more cost-effective to leave the production up to professional plants.
