

Trees for Kids Nursery Notification Letter

Nursery: _____

_____ (*applying organization*) is partnering with the Iowa Department of Natural Resources (DNR) for the fall 2024 Trees for Kids grant program. The organization will purchase trees directly from the nursery of their choice without the requirement of a competitive bidding process. **The nursery is required to provide an accurate quote which specifies ALL of the following: species and cultivar(s), if applicable, including common AND scientific name; quantity, and unit price; and total price, including mulch, if applicable.** Please DO NOT include tax with your quote, as Trees for Kids is a tax-exempt program. Please note the following:

1. **Stock MUST be container grown**; field-grown, balled-and-burlaped, or other non-containerized stock WILL NOT be paid for by the applying organization or DNR - ABSOLUTELY NO EXCEPTIONS;
2. **Containers MUST be either 5-gallon, 7-gallon, 10-gallon, or root bag equivalent**; prior approval MUST be received from DNR if providing stock that is smaller than 5-gallon or larger than 10-gallon;
3. In order to maintain species diversity, **no more than 3 trees of any species OR genus is allowed for quotes of 30 trees or less; no more than 10% of any species or 20% of any genus is allowed for quotes of more than 30 trees**;
4. **Species and cultivars MUST adhere to the “Approved Species List” accompanying this letter**; those that are not on this list MUST receive express approval from the program coordinator;
5. Trees for Kids STRONGLY encourages the use of root-pruning containers, whenever possible, as such containers provide root culture superior to that of hard pots.

By checking this box, I acknowledge that I understand the nursery stock requirements set forth above, and that **stock will meet the standards set forth in ANSI Z60.1**. I also understand that if I fail to acquire permission from the Trees for Kids DNR coordinator for any deviations from these requirements, the stock that I provide will be considered a donation to Trees for Kids. I am fully aware that stock will be inspected by a DNR forestry representative at time of planting, and that any stock determined to be dead or dying, subject to disease, or otherwise unfit for planting will be rejected.
